EDUCATION

B.Tech in Computer Science and Engineering
ICFAI University (2022–2026)

SKILLS

Python, Java, SQL

PROJECTS

Fraud Detection System using Machine Learning

Developed a machine learning model to detect fraudulent transactions in real time. Utilized Python, Scikit-learn, Pandas, and Random Forest for classification. Implemented data preprocessing, model training, and evaluation with high accuracy.

Stock Market Fraud Detection

Designed an AI model to identify anomalies and manipulative trading behaviors in stock markets. Utilized Python, Streamlit, and Machine Learning algorithms for prediction. Built an interactive web dashboard for real-time fraud detection insights.

CAREER OBJECTIVE

To obtain a challenging position in Artificial Intelligence and Machine Learning, where I can apply my analytical and programming skills to build intelligent, data-driven systems that solve real-world problems.

LANGUAGES

English, Hindi, Telugu
